

CHLOE | HONG KONG

FIRST YEAR IN BSC (HONS) HOSPITALITY

“... I am delighted that I achieved a 2:1 in my degree. The lecturers were really supportive, I wouldn't have been able to achieve my grade without their guidance.”

“It is difficult to remember everything 4 years ago. I remember that the first day I felt like I was dreaming – it was a new environment and, to be honest, I felt a little homesick. But the homesickness didn't last long, within a few days I had met lots of friends from different countries and we all went out partying! Meeting new friends was a real highlight of the whole UPIC experience for me, everyone was so friendly.”

If you had to describe your UPIC and University of Plymouth experience in 3 words, what would they be and why?

Happy – Studying at Plymouth made me feel really happy. There is a real community spirit in the city and the university and I feel this is why I've made a number of lifelong friends. I've made friends from England, India, United Arab Emirates, China, and Italy. And let's not forget Malaysia where my new best friend is from!

Supportive - When I was originally in college my results were not very good, so I am delighted that I achieved a 2:1 in my degree. The lecturers were really supportive, I wouldn't have been able to achieve my grade without their guidance.

Independent – I have learnt how to be independent during my time in Plymouth. When you are at home you have lots of family around you, however when you go to university you have to solve problems on your own.

What piece of advice would you give to students considering Plymouth?

Just relax and enjoy it. You may get homesick at first, but once you meet your new friends you may even forget your parents' names!

I would also strongly recommend students to ask the lecturers for help whenever they get stuck. Do not be afraid to ask, the teachers are really approachable and supportive and they were always able to give useful feedback to help me improve.
